RIHAB RABBANI

FULL-STACK DEVELOPER

LinkedIn | Gmail | GitHub

SUMMARY

Full-stack developer with 2 years of experience, currently pursuing a Computer Science degree at FAST University Islamabad. Skilled in multiple frameworks and experienced in developing scalable, responsive websites, with projects ranging from note-taking applications to a freelance platform.

PROFESSIONAL EXPERIENCE

NUSTrive   **March 2025 - Present**
- Working on website development for Nustrive, an entry test preparation platform. Leading the creation of a dynamic website featuring lecture content and AI-based quizzes to help students prepare effectively.

Fast Development Club   **Aug 2024 - Present**
- Contributing to the development of the app version of the student portal.
- Collaborating with the team on the app's backend, frontend, and database integration.

PROJECTS

RecipeBloom   **April 2025 - Present**
- Developing RecipeBloom, an AI-powered platform where users can input available ingredients and discover personalized recipes generated specifically for them.

IntelliHire   **Feb 2025 - April 2025**
- Developed IntelliHire, an AI-powered platform enabling real-time communication between clients and freelancers using WebSockets.
- Integrated AI-driven insights to help freelancers optimize their CVs and assisting clients in identifying the best candidates for their job requirements.

Customer360   **Aug 2024 - Dec 2024**
- Developed Customer360, an eCommerce clothing store built using Spring Boot and Thymeleaf, following software design and analysis principles to ensure a scalable and maintainable architecture.

SKILLS
